

What if not acted?

affordable research paper writing service

1. Do not be upset!

The most important "action", if you did not do, is in no case to miss hands! Do not worry! It is even rather not an action option, but an internal installation.

Everything is fine, no one will kill you for the fact that you could not undergo a competition for a budget place (you can enter a paid basis with almost 100% warranty).

We advise you any, even at first glance, seemingly unfavorable situation (in our case, you could not enter the university) to consider as an opportunity.

Opportunity for yourself, first of all. For self-development, self-education. After all, most of your friends who wanted to enter the university, did it?

And they immediately, since September begin methodically, you can even say, "Toporn" attend lectures on the schedule. Then hand over control and tests with exams.

Although we wrote in our article: Student's life: Help for the first room, that students can self-realize in the university's walls, however, such self-realization is limited to the neat of study.

Study, studies, learning, lectures, lectures, lectures. And so day to day. No freedom! Another thing you, well, did not come, what and what of this? But you have a unique opportunity to do what you really like to do.

Next, we will tell you about some of the possible classes, but for now we will be talked by almost the inevitable consequences that appear almost immediately, after you understand that you could not enter the university.

Go to the army². Go to the army.

The army for guys who could not enroll in the university immediately after school, almost inevitable. Of course, if you are not a completely healthy person, then you will not go to the army. But the majority of former schoolchildren who failed to do (or simply not wished to learn) go to the army.

Army, army. Everyone around is afraid of this word, as if the army is a war. There are, of course, unpleasant situations in the army (and where are they not at all?)

Sorry, can you also beat when you learn from university? Everything is relative. Therefore, if the fate

sent you to serve Russia, again, consider this situation as an opportunity for yourself. After all, the army is a whole school of life.

If you are an adequate person who has a hard rod of morality, i.e. If you are a decent, executive, fair and strong spirit man, then you are unlikely to touch the army problems. Strong, in every sense, people always respect and fear.

Therefore, if you have to go in the fall in the army, then in the summer, try to develop the above qualities listed above. It would also be nice to become stronger physically.

Therefore, while there is time, do physical exercises, develop muscles, become more hardy (run with heavy cargo). If you do the things in advance that you have to do in the army, then you will be sure that the army life will be completely demolished for you.

3. Go to work.

Many students always have a coherent question. They cannot earn money, because Learn. And you can! Therefore, one more action options, if you did not do - it goes to work. Just warning immediately: if you still want to try your hand in arrival next year, do not put the first place work! The work should be a kind of "university".

How to understand the "university"?

Here, under the word "University", we understand the following: First, work will help you not to drop from the graph of early lifting (on it, most likely, you will also have to get up early, as you got to school), and, secondly, work - This is a full-fledged University of Practice.

After all, in the usual university you, by and large, will study almost one theory. Therefore, if you want to enter the next year at the university, then try to find yourself such a job for a year, which will be close with your estimated specialty in the university.

For example, you want to enter the marketer. Then arrange a promoter or similar specialist close to the marketing area.

Thus, if you can enroll in the university for the next year, you will have an indisputable advantage over your "green" one-laugures. You will be in practice to know what is the work of the marketer (promoter).

Yes, and on the exam, practical skills will help you to remember the theory that teachers will ask.

You see - again you have found the opportunity for yourself, not a problem. You can see everything from different points of view, remember this.
